

RC21.1x

...Fully-featured weekly thermostat and modulating remote control with enhanced functions and HMI.

BERTELLI&PARTNERS
SYSTEMS & CONTROLS FOR HEATING APPLIANCES

EASY

through its text based Menu designed in a user friendly perspective. Everyone is guided to accomplish the hardest operations. Moreover the most commonly used functions can be easily accessed thanks to its intuitive graphic windows... and you can even forget the manual!

COMFORT

with a perfect integration in the Bertelli&Partners's plant architecture. The Device is designed to work in a single Zone and to keep synchronized State, Calendar and DHW Set in a Zoned heating system.

CONTROL

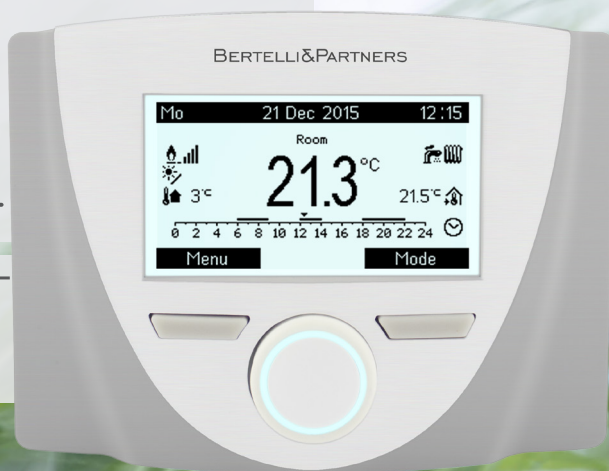

thanks to its modular programming architecture, it can communicate with different devices and become the human interface of the whole system.

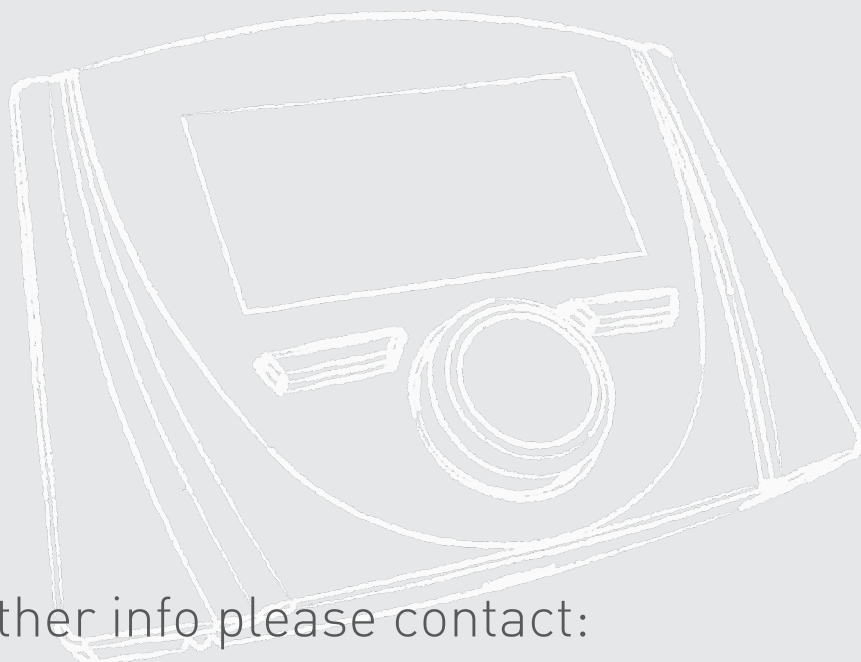

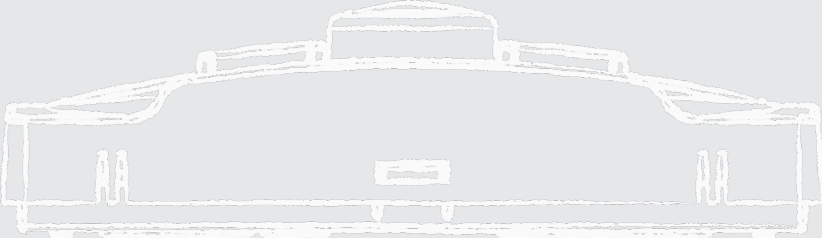

SAVING

in combination with the App "B&P Remote Controller" wherever you are, you can save money and improve your environmental attitude through a weighted use of energy.
